Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 40-49 are drawn to method of making a window, classified in class 29, subclass 569.
- II. Claim 17-39, 51-59, 64, 65 are drawn to Window Material, classified in class 052, subclass 171.3.

Inventions Group I and Group 2 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case The claimed window can be made by a process when the emissivity is different from that recited in the method of making in Group I.

Should applicant elect Group II She/he is further required to make the following election Species

This application contains claims directed to the following patentably distinct species of the claimed invention: species 1 soluble matrix claims 23, 31, 35 and species 2 insoluble matrix claim 24.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is

finally held to be allowable. Currently, Claims 17-22,25-30, 32-34,36-9,51-59, 54,65 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication from the examiner should be directed to Sabrina Dagostino whose telephone number is 703-306-3485. The examiner can normally be reached on M-f 7-3pm.
